

"What is perception of society regarding Elder Abuse and what are your recommendations to stop It"

Dear Friends, today we are living in 21st Century. The concepts of Universal citizenship or global citizenship have now become somewhat very popular in our country. While living, learning, socializing we are now become GLOBAL citizens.

So friends while enjoying this century its fruits, what we are experiencing around our surrounding, is it same as we preach, learn, cultivate.

No certainly not, the difference in the reality, & the truth is almost very much different, why it is so..

We call ourselves, very honorable, sophisticated citizens of India this Universes, then why many inhuman acts are now becoming very much common in these days. RAPE, MURDER, SUICIDE, Theft, robbery, murder of adults for Money, etc are now becoming very much common as a part of Day or Job.

Reasons for Abuse on adults : In today's competitive world ,Parents are now become Heavy burden on children when they grows up & stands on their own foot. due to which many adults are now living in separate family apary from children. Many prefer to stay in Vardhashramma in lather life to avoid loneliness & to have peace of mind.

Due to which, they many times suffers form the attacks from greedy youths from the society for Money, jewellery etc. which results many time for their lives. Since greed of these alcoholic, persons are at such a point of level by which many adult people dies immediately after minor or major attack.

Society has very important role in dealing with this issue. Since day by day the population size of Adults is bound to increase in couple of years to come. In every house hold 2-3 adults will be definitely bound to accommodate. so as a responsible citizen of this country we from our self, have to take a effective step to prevent such un humanitarian work related to ADULTS.

My personal recommendations to stop it:

1)We have to honour our adults by way of words, love etc.

2)In social places, we have to make arrangement for sitting, relaxing for adults. While on platform, we have to help adults to climb/get down form the train first.

3)As per the Method of Nana Nani park ,more gardens, social place should have to kept reserve for development of such park etc.

4)Childrens should not keep alone to their parents.

5)Even if due to any condition if parents/adults are bound to live in alone they should live in groups or by taking appropriate precautions form all the angels of safety & security.

6) All this actions should be safeguarded by Govt. by making a regular law for protections of adults in our society.

By these actions, i hope the abuse on adult will be reduce by some level or will certainly will come down by major effects.
